# Dendro A
Bottom Assembly Instructions

Points **A** and **E** will come already tie wrapped together; if not attach all point **A** together and point **E** together.

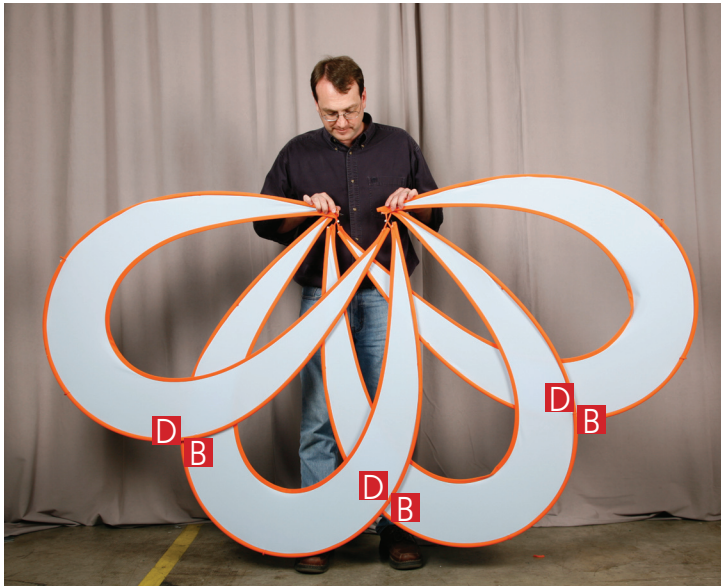

Check to see that you have above configuration before proceeding.

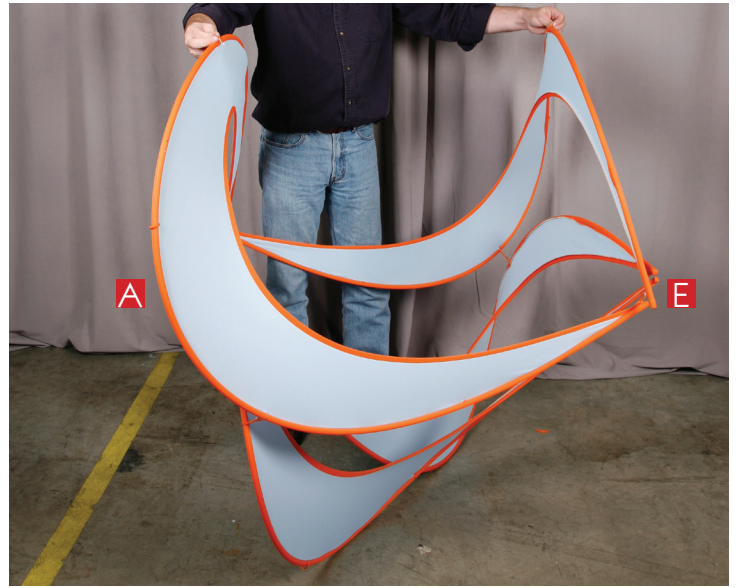

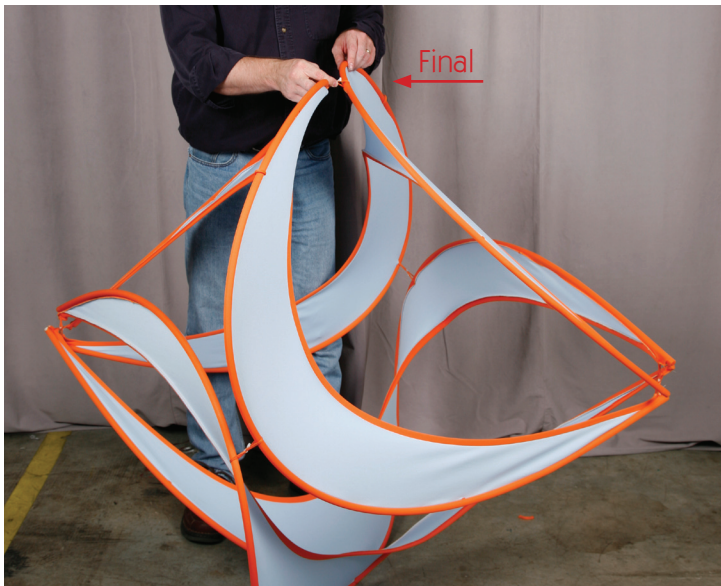

Attach **Loop B** to **Loop D** of next petal.

Rotate and continue attaching **Loop B** to **Loop D** on each petal.
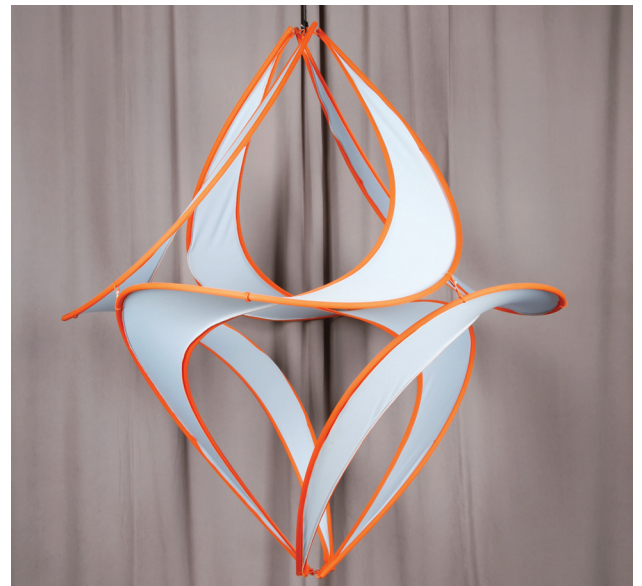

See above configuration before final attachments (If you do not see this pattern you are down the wrong road).

Push Points **A** and **E** apart.

Squeeze form together to make the final connection of point **B** and point **D** and make final loop closure using a with butterfly twist clip.

Dendro A.
