

Gridlock Clamp

A fast and easy way to construct a pipe grid, these Gridlock Clamps are used at pipe intersections so that pipes can be installed wall-to-wall without cutting. Grade 5 bolts and locknuts are included. Works with Schedule 40 pipe.

Our Grid-Lock Pipe Clamps are made from Two Pieces Of Formed 7-Gage Steel Flat Bar that fit firmly around steel pipe. The clamps are fastened together with 3/8" bolts, forcing the pipes together and stopping any movement or rotation.

Design load to 1800 lbs.

Since pipes are not pushed through pre-assembled clamps, they don't bind. Clamp portion is made in the USA

Available for 1 ¼" and 1 ½" Schedule 40 pipe
