

## PROJECTION FABRIC SPECIFICATIONS

**FABRIC:** EXTRA WIDE MUSLIN - LIGHT GREY  
**SKU:** MUSX0037

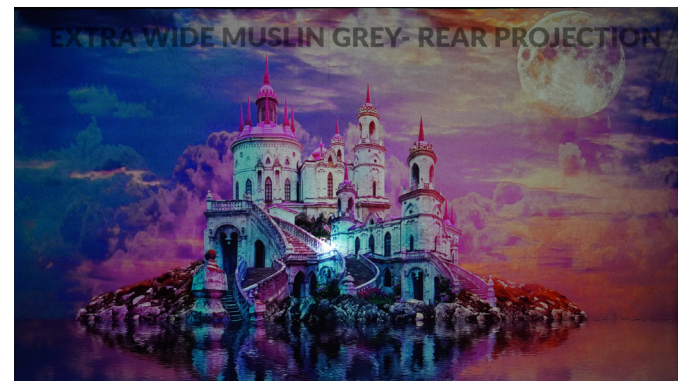

**DESCRIPTION:** The Light Grey tone of this extra wide muslin increases the apparent contrast and color saturation of images and video projected on this surface. Blacks appear deeper and colors richer, even in moderate ambient light levels. Though a lower gain in both front and rear applications than bleached white muslin, the Light Grey Extra Wide muslin offers all the same benefits in terms of ease of installation and seamless construction even at large scale. When use as a rear projection surface though some hot spotting may be noticeable. Made from 100% cotton, muslin meets NFPA and CA fire codes but requires re-testing every calendar year.

Colors:	Grey	Content:	100% Cotton
Width:	31'-0"	Construction:	Weave
