

PROJECTION FABRIC SPECIFICATIONS

FABRIC: EXTRA WIDE MUSLIN - BLEACHED WHITE
SKU: MUSX0069

DESCRIPTION: Extra wide muslin is the preferred material for cycloramas and wide seamless projection surfaces. The bleached white finish provides good gain for front projections, while the weave of the cotton fabric provides sufficient translucence for use as a rear projection surface as well, though some hot spotting may be noticeable. Made from 100% cotton, muslin meets NFPA and CA fire codes but requires re-testing every calendar year. A notable advantage of cotton screens is the ease of installation and ability to remove wrinkles using an iron, or even a mist of warm water to spot-tighten the fabric.

Colors:	White	Content:	100% Cotton
Width:	39'- 0"	Construction:	Weave
Roll Length:	apprx 65 yrd	Thickness:	
Weight:	260 GSM	Stretch:	
Finish:	Matte, Plain weave	FR:	NFPA 701, CA Title 19,

Front Projection		Rear Projection	
Gain @ 90°:	0.91	Gain @ 90°:	0.51
Viewing Angle:	>175°	Viewing Angle:	>175°

Best choice for extra wide. Wrinkles easily removed with iron or hot water

Minimal hot spotting.
