

PRODUCT DATASHEET

Product	Wahl Winch 50 Heavy Duty DMX Winch Part No. WAHL0007	
Description	<p>The strongest winch in the Wahlberg range, the Winch 50 maintains a compact form while providing a 50Kg (110lb) of lifting strength. Working alone or configured together, the Winch 50 can be used for flying dimensional set pieces or rigging heavier weight drapery fabrics. DMX control makes setting positions and limits quick and easy, and complex motion cues can be written and recalled with ease.</p> <p>Unlike chain motors or customized scenery winches, the Wahl Winch 50 is perfect for fast fly cues and synchronized operation via DMX control. Use multiple winches for independent control of each pick line of a contour or tab curtain. Fly in flats, doorways, ceilings and mirrors without the use of battens and fly rails -- all with the ease of control from a DMX lighting desk or stand-alone DMX controller.</p> <p>Perfect for Technical Directors, Church technicians, Shop Project Managers, Exhibit builders and decorators – virtually anyone with a need for simple, affordable and safe automation.</p>	
Features	Features <ul style="list-style-type: none"> • Compact form, heavier lifting • Fast cable retraction • 50kg (110lb) working load • Precision control of position and speed via DMX (7 channels) 	Benefits <ul style="list-style-type: none"> • Mount practically anywhere • Speedy scene changes even with heavy set pieces • Suitable for heavy weight fabric rigging, and for lifting scenic elements like flats, ceiling pieces, picture frames and window units • Safe, repeatable and accurate positioning and limit settings.
Specifications	<ul style="list-style-type: none"> • 50 Kg (100lb) working load limit • 3.5-18 inch/sec. speed • 39ft lifting height (50ft optional) • 3mm coated wire rope • 16-bit DMX precision • 0.04in position accuracy 	<ul style="list-style-type: none"> • 5-pin DMX input and pass through • 7 Channels of DMX control • Powercon™ Input 230VAC input, 550 watt consumption • 12.9 x 11.7 x 17.5 in; 66lbs
