SPECIFICATIONS FOR PRESTIGE VELOUR

FABRIC	fiber content	100% Trevira CS (polyester)
	width	54" (137 cm)
	unit weight	26 oz. per linear yard (737 gm/linear yard)
CONSTRUCTION	thread count	48 (ground ends) x 48 (ground fill) x 51 (pile ends)
	pile thread	29/2 Trevira (0.825 lbs/linear yard)
	ground thread	29/2 Trevira (0.43125 lbs/linear yard)
	fill thread	29/2 Trevira (0.41325 lbs./linear yard)
	pile density	1222 pile tufts/sq. inch
	pile height	95/1000"
	pile percentage of weight	49%
	backing percentage weight	51%
	surface treatment	none
Performance Testing	ASTM D 4157-07: Standard Test Method for Abrasion Resistance of Textile Fabrics (oscillatory cylinder method)	Passed 50,000 cycles
FLAMMABILITY	Inherently Flame Retardant (IFR) <i>meets requirements of:</i> NFPA 701 (1989), small & large scale tests NFPA 701 (1999), test #1 California Title 19, Small Scale test	
Environmental Data	Neither hazardous wastes nor emissions are produced during the manufacture of Trevira fibers. With no harmful additives, these fibers can be recycled and have been awarded the European Oeko-Tex Standard 100 Certificate for safety and environmental friendliness.	
Care Instructions	Can be washed at normal temperatures or at 71 degrees C for disinfection. Can also be disinfected with chlorine or peroxide products without adverse effect on the fibers. Water washing or dry cleaning will not incur shrinkage. No post wash pressing should be necessary.
