

Certificate of Conformance

ReVive™ 22oz IFR Velour

ReVive™ 22oz IFR Velour is composed of 70% recycled synthetic fiber made from post-consumer plastic bottles. Each yard of ReVive™ 22oz IFR Velour diverts 12 bottles from the waste stream and landfills. The specification of ReVive™ 22oz IFR Velour has a measurable and meaningful impact on reducing waste and minimizing damage to the environment.

This document certifies that count of recycled bottles used in the production of the draperies and textiles ordered as follows:
